

## Transfer sheet 130 x 80 cm h239\_57

H239\_57 transfer sheet in low-friction nylon, 130x80 cm, capacity 300 kg. Ideal for safe and smooth repositioning of bedridden patients.

The **H239\_57 transfer sheet** is a technical aid specifically designed for manual load handling in the healthcare sector. Designed to optimize pushing, pulling, and sliding maneuvers, this device allows for the **repositioning of the patient** in bed by drastically reducing surface friction. Thanks to the double-layer sliding technology, the operator can manage movements in every direction without resorting to direct lifting, preventing musculoskeletal risks and ensuring user comfort.

## Technical characteristics

- **Material:** Ultra Low Friction nylon with extremely high glide.
- **Dimensions:** 130 x 80 cm.
- **Maximum capacity:** 300 kg (suitable for bariatric patients).
- **Maintenance:** Machine washable up to 60°C.
- **Sanitization:** Compatible with disinfectant solutions diluted to 5% or alcohol-based.
- **Configuration:** Tubular structure for bidirectional sliding.
- **Safety:** Wear-resistant and free of abrasive seams on the contact surface.
