

Transfer sheet 190 x 75 cm h239_56

Ultra low friction nylon transfer sheet (190x75 cm). Ideal for bariatric handling up to 300 kg with minimum effort for the operator. The **H239_56 transfer sheet** represents a professional solution designed to optimize **manual patient handling** maneuvers in clinical and care settings. Thanks to its low-friction structure, it facilitates pushing, pulling, and lateral sliding operations, ensuring maximum safety for the patient and reducing the biomechanical load for healthcare personnel.

Made of **ultra low friction nylon**, this aid allows the two edges of the sheet to slide easily over each other. This mechanism eliminates the need for direct lifting, protecting the patient's skin integrity and preventing friction trauma. The high weight capacity and material resistance make it suitable for managing bariatric patients as well.

Technical features

- **Type:** High-glide sliding transfer sheet.
- **Material:** Lightweight and resistant Ultra Low Friction Nylon.
- **Dimensions:** 190 x 75 cm.
- **Load capacity:** Certified maximum capacity up to 300 kg.
- **Maintenance:** Machine washable up to 60°C.
- **Sanitization:** Compatible with disinfectant solutions diluted to 5%, including alcohol-based solutions.
- **Safety of use:** Recommended for single-patient use to prevent cross-contamination.
