

Transfer sheet for injured persons h239_16

Folding transfer board. Dimensions: W.180 x D.50 cm. Radiolucent and waterproof.

Transfer sheet ideal for nursing homes and hospitals. Specific for use in **manual handling operations of patients and injured persons**. It makes pushing, sliding, and pulling maneuvers easy and practical, **ensuring maximum safety** for both the patient and the healthcare operator. Consisting of an **etaflon base and ultra low friction nylon coating**. Made with high-frequency welding that makes it **waterproof**; it is also **radiolucent and easy to clean**. Foldable and complete with **padded nylon handles** that make it comfortable to transport.

Technical features:

- Dimensions: W.180 x D.50 cm
- Capacity: 250 kg
- Foldable
- For transfers with a height difference of up to 15 cm and a distance of up to 20 cm
- Etaflon base
- Nylon base coating
- Ultra Flow Friction sliding sheet: RIP-STOP nylon
- Padded nylon handles
- Washable at max 60°C
- Disinfection possible with 5% diluted disinfectants, including alcohol-based ones
- Waterproof
- Radiolucent
- Device Class 93/42: Class I
- ISO Code: 12.31.03.003
- CND Code: Y123003
- RDM Code: 1532910/R

INFORMATION

- **length** 180 cm
- **Width** 50 cm
- **capacity** 250 Kg
