

## Transfer sheet h23904

Patient lifting sheet with 10 padded and seamless handles. Composed of a coated polyethylene core. Maximum capacity: 280 kg. Dimensions: 152 x 87 cm.

**The transfer sheet** is an effective solution to optimize work quality and increase patient safety in the healthcare-assistance sector.

The sheet allows the transfer and lifting of people with zero strength and mobility on beds, stretchers, operating tables and floors. It is padded with a **sheet of resistant** but flexible material and a strap that forms **10 sturdy handles** for a firm grip. Its particular **resistant structure**, allows the movement of patients with a high body weight.

### Technical features:

- Material: coated polyethylene
- Equipped with a zipper to facilitate cleaning
- Number of handles: 10
- Length: 152 cm
- Width: 87 cm
- Maximum capacity: 280 kg
