

Transfer sheet with 4 handles h23903

Patient transfer sheet with four padded handles consisting of a coated polyethylene core. Transfer capacity: 180 kg. Dimensions: 100 x 41 cm.

The transfer sheet is an effective solution for optimizing work quality and increasing **patient safety** in healthcare and assistance settings.

4-handle sheet ideal for transferring and lifting patients in public and private hospitals, nursing homes, and rehabilitation centers. The sheet allows for transferring and lifting people with no strength and mobility on floors, beds, stretchers, and operating tables.

It is padded with **a layer of resistant** but flexible material and a strap that forms 4 sturdy handles for a firm grip. The patient's weight is **evenly distributed** on the product; the comfortable handles offer good working positions.

Technical specifications:

- Material: polyethylene
- Number of handles: 4
- Dimensions: 100 x 41 cm
- Maximum capacity: 180 kg
