

Transport chair with armrests h567_28

Transport chair for the elderly and disabled. Load capacity: 159 kg. Open dimensions (H x D x W): 910x505x710 mm.

The patient transport chair is useful for emergency transport in hard-to-reach places, such as stairs, elevators and narrow corridors. The product is equipped with **4 transport handles**, 2 of which are at the front. Thanks to the **folding structure**, the chair can be easily stored without taking up much space. The product is built in **lightweight aluminum with waterproof black nylon cloth** and is equipped with a storage pocket. At the base there are 4 wheels, 2 of which are fixed and 1 equipped with a lock.

The comfortable armrests ensure comfort for the user.
