

Transport trolley with deep-drawn platform L. 1100 mm h492_16

Professional stainless steel trolley for heavy loads (120 kg). Continuous tubular structure, 1000x600 mm platform and braked wheels for HoReCa.

This **professional trolley** is designed specifically for the handling of heavy and bulky goods in intensive operational contexts such as warehouses, catering activities and commercial facilities. Made entirely of **stainless steel**, it stands out for a closed and continuous round tube structure that guarantees maximum torsional rigidity. The **deep-drawn platform** is enriched with profiled and beveled edges for operator safety, integrating an anti-vibration panel in synthetic material that reduces noise pollution during use.

Maneuverability is ensured by an ergonomic push handle integrated into the frame and a system of **4 swivel wheels of 125 mm**, two of which are equipped with parking brakes. The mounting plates screwed in four points provide superior structural stability, while the **polyethylene bumpers** protect the surrounding furniture and equipment from accidental impacts.

Technical specifications

- **Total load capacity:** 120 kg
- **Deep-drawn platform dimensions:** 1000 x 600 mm
- **Platform height:** 287 mm
- **Material:** Stainless steel
- **Frame:** Continuous round tubular Ø 25 mm
- **Overall dimensions:** L. 1100 x D. 700 x H. 1020 mm
- **Weight:** approx. 14.8 kg
- **Wheels:** 4 swivel wheels Ø 125 mm (2 with brake) fixed on 4-point plates
- **Protections:** 4 round polyethylene bumpers
- **Safety:** Profiled and beveled platform edges
- **Comfort:** Synthetic anti-vibration panel and integrated handle
