

Trapezoidal table with melamine top h848_31

Trapezoidal table h848_31 (120x60x53h cm) in melamine thick. 25 mm and tubular Ø 40 mm. Joinable, for nursery school classrooms.

The **Trapezoidal table with melamine top h848_31** is a school piece of furniture designed for the furnishing of classrooms and educational environments dedicated to early childhood. This table solves the operational need to create flexible and safe work configurations, allowing both single use and the joining of multiple modules to set up classrooms. The structure reduces the risk of accidental impact thanks to the design of the trapezoidal top with rounded edges. Aimed at nursery schools, daycares, playrooms and educational centers, the furniture consists of a 25 mm thick melamine top and a tubular structure with a diameter of 40 mm. The table has dimensions of 120 x 60 cm with a height from the ground of 53 cm and a net weight of 18.80 kg. The structure is supplied in Light Gray and Metallic color variants, while the top is made in the Ivory finish, with the possibility of requesting the top in a different color upon request.
