

Tray and cutlery trolley h519_16

Professional **tray and cutlery trolley** with a hybrid **wood and metal** structure, increased height of **125 cm**. Equipped with an upper cutlery compartment and integrated dispenser for **300 napkins**. Elegant and functional design, ideal for optimizing flows in self-service areas, fast-food outlets, and buffets.

The **tray and cutlery trolley** is a complete vertical service station, designed to offer maximum ergonomics within restaurants, fast-food outlets, and diners. Thanks to its height of 125 cm, it allows customers to pick up the necessary items for the table setting without having to bend down, significantly improving ease of use. The structure combines the solidity of **metal profiles** with the welcoming design of **wooden side walls**, elegantly shielding the trays stored inside.

This model is extremely versatile and organized: the top houses a spacious cutlery compartment and a **built-in napkin dispenser** with a capacity of up to 300 pieces (9x13 cm format). Movement, even when fully loaded, is guaranteed by 4 high-quality swivel wheels, which allow the trolley to be strategically positioned near buffets or room entrances, ensuring stability thanks to the two integrated brakes.
