

Tray collection bin h684_148

Laminated wood tray collection bin, height 75 cm. Customizable design module for fast food and schools, ideal for recycling islands.

The **tray bin h684_148** is the ideal technical solution to transform post-consumption management into a refined and professional furnishing experience. Designed to solve the problem of visual clutter and the accumulation of dirty trays, this unit integrates an **upper area dedicated to tray collection**, optimizing workflows in HoReCa contexts. With a **height of 75 cm**, the module is designed to be accessible even to school users, ensuring children a comfortable and safe use.

Built in high-quality **laminated wood** and available in multiple color variants, the structure boasts exceptional solidity (75 kg), fundamental for resisting the stresses typical of fast food and canteens. Its modular nature allows it to be placed alongside other elements, such as the h684_147 model, to configure **complete recycling islands**. Upon request, the product is customizable with company logos, structural plinths, and specific labels for separate waste collection, allowing total adherence to the venue's visual identity.

Technical features

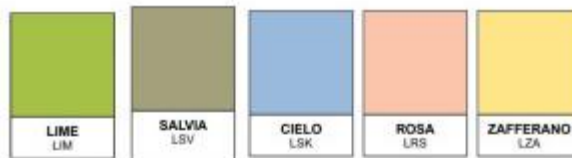

- **Material:** High-density laminated wood in various colors
- **External dimensions (W x D x H):** 550 x 600 x 750 mm
- **Internal compartment dimensions (W x D x H):** 1583 x 623 x 910 mm
