

Tray emptying bin 260 lt h41355

Professional tray emptying bin 260 lt in satin stainless steel, with swinging door, tray holder rail, keyed door and adjustable feet. Suitable for catering.

The tray emptying bin is professional equipment designed for high-volume catering environments such as restaurants, canteens, self-service and fast food. It solves the problem of efficient waste management and disposal of meal residues, integrating the operational workflow during the tray cleaning cycle. The structure in **satin stainless steel** ensures durability, hygiene and ease of sanitization in humid and high-stress environments.
