

Tray emptying bin for self-service h509_12

Stainless steel tray emptying bin with pedal, tray shelf, wheels and adjustable feet. Container capacity 500x510x740 mm.

The tray emptying bin is an essential equipment for **self-service** services in contexts such as fast food outlets, pizzerias, snack bars and shopping centers. It allows the hygienic collection of waste and dirty trays, facilitating service management without staff intervention during the customer cycle.

Made entirely of **stainless steel**, it guarantees durability and ease of cleaning in high-traffic environments. The opening is controlled by a **pedal** that allows hands-free access, maximizing hygiene protocols; however, **manual opening** is also available for particular situations.

Technical characteristics

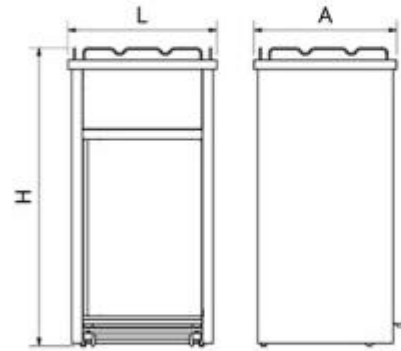

- **Structure:** stainless steel
- **Opening system:** pedal with alternative manual function
- **Upper shelf:** equipped with rods for positioning empty trays
- **Front door:** can be opened for extraction of the internal container
- **Waste opening:** swinging flap
- **Mobility:** two easily maneuverable wheels
- **Stability:** two height-adjustable feet
- **Handle:** ergonomic
- **Capacity:** internal container 500 × 510 × 740 mm
