

Tray transport trolley h09190

Professional double-column tray trolley with **20-tray** capacity. **Stainless steel** structure and **white Perfex** side panels, ideal for organization and tidying in canteens, fast-food and catering.

The **professional double-column tray trolley** is the ideal solution for the logistical management of large tray volumes in high-traffic environments. Designed to optimize workflows in fast-food outlets, corporate canteens, self-service restaurants and catering contexts, this model combines the robustness of stainless steel with the clean and functional aesthetics of Perfex.

The **stainless steel** supporting structure guarantees exceptional stability and long-term durability, effectively resisting moisture and heavy loads. The **white Perfex** side panels not only provide a tidy appearance, partially hiding the trolley contents from guests' sight, but also facilitate cleaning. Thanks to the 20 levels available with a useful distance of **12 cm** between the guides, the trolley allows trays to be housed even with crockery or ready meals, ensuring order and hygiene.

Technical features

- **Structure material:** High-quality Stainless Steel
- **Paneling:** White Perfex side panels
- **Load capacity:** 20 Trays (double column of 10)
- **Distance between levels:** 120 mm (wide spacing for crockery)
- **Total dimensions:** W 74 x D 62 x H 175 cm
- **Configuration:** Double column for spatial optimization
- **Movement:** Professional wheels for smooth transit

* Trays not included. Structure complies with hygiene requirements for the catering sector.

INFORMATION

- **capacity** 20 trays
- **Height in millimetres** 1750.000000
- **Width in millimetres** 740.000000
- **Depth in millimetres** 620.000000
