

Tray transport trolley h684_07

Professional **triple column** tray trolley in **AISI 304 stainless steel**. Ultra-high capacity for **36 trays/pans**, equipped with chrome-plated steel wire runners and oversized 125 mm wheels. The ultimate solution for high volumes in motorway service stations, canteens and cooking centers.

The **AISI 304 stainless steel triple column tray trolley** represents the ultimate expression of logistical efficiency for high-density collective catering. Designed to withstand the incessant rhythms of motorway service stations, large diners and fast food outlets, this model allows for the management of as many as **36 trays** simultaneously, drastically optimizing clearing and distribution times.

The structure, entirely made of **AISI 304 stainless steel**, guarantees superior hygiene and total resistance to corrosion. The **36 chrome-plated steel wire runners** offer smooth tray sliding and minimize the accumulation of residues, facilitating deep cleaning operations. Despite its significant dimensions, maneuverability is excellent thanks to the 12.5 cm swivelling wheels and non-marking bumpers. For greater aesthetic discretion in the dining room, **customization with HPL panelling** can be requested.

Technical characteristics

- **Structure material:** AISI 304 Stainless Steel (high professional standard)
- **Runner material:** High-sliding chrome-plated steel wire
- **Capacity:** 36 trays / pans (12+12+12 configuration)
- **Distance between runners (Pitch):** 100 mm
- **Movement:** 4 swivel wheels Ø 125 mm
- **Protection:** 4 non-marking rubber corner bumpers
- **Total dimensions:** L 132.2 x D 61.2 x H 163.2 cm
- **Optional:** Side and rear HPL panelling (upon request)

* Trays not included. Product compliant with HACCP regulations for food safety.
