

Tray transport trolley h887_29

Low stainless steel trolley for 7 GN 1/1 trays with top work surface, double safety lock and braking wheels. Compact and versatile.

The **professional stainless steel tray trolley** is a multifunctional solution designed to optimize workflows in industrial kitchens, restaurants and pastry labs. Thanks to its low height (94.5 cm), this model not only transports up to **7 Gastronorm 1/1 trays**, but also offers a practical **integrated work shelf** on the top. This extra surface is ideal for quick portioning or preparation tasks directly on site. The stainless steel structure ensures maximum corrosion resistance and impeccable ease of cleaning, while the **locking system on both sides** ensures that the trays remain stable and secure during every movement.
