Tray trolley for 7 GN1/1 trays h464_48

Low stainless steel tray trolley for 7 GN 1/1 trays (55x38x90 cm). Equipped with bumpers, braking wheels and wide space between levels (8 cm).

The **professional stainless steel tray trolley** is the ideal compact solution to optimize the organization and transport of Gastronorm containers in restaurants, canteens and laboratories. Thanks to its height of 90 cm, this model fits perfectly under standard work surfaces or can be used as an additional mobile station. The structure, made entirely of high-quality stainless steel, guarantees excellent resistance to wear and ease of sanitization. The trolley offers **7 loading levels for GN 1/1 trays**, with a generous space of 8 cm between the shelves which promotes air circulation and allows the insertion of containers of different depths. Safety is a priority: the trolley is equipped with **4 corner bumpers** to protect furniture and walls during movement.

Technical characteristics

- **Material:** Stainless steel (robust and anti-corrosion)
- **Capacity:** 7 Gastronorm GN 1/1 containers
- **Space between levels:** 80 mm (8 cm)
