

Tray trolley for GN 1/1 trays - 20 levels h464_240

Stainless steel tray trolley for 20 GN 1/1 trays. Robust structure (45x65x165 cm), 20 kg capacity per level and wheels with bumpers. Ideal for large kitchens.

The **professional stainless steel tray trolley** is a high-density logistics solution, specifically designed for the needs of large catering facilities, canteens, and cooking centers. Thanks to its **20-level** configuration, this model allows for the management of massive flows of **GN 1/1** containers, optimizing vertical space within laboratories and preparation areas. The structure is made with 25x25 mm tubular profiles that provide stability and torsional resistance, while the 6.8 cm distance between shelves ensures optimal storage capacity for trays and pans of standard depth. Movement is facilitated by four swivel wheels, designed to guarantee speed and safety during meal transport.

Technical features

- **Material:** High-quality stainless steel
- **Capacity:** 20 Gastronorm GN 1/1 containers (not included)
- **Total dimensions:** W. 45.5 x D. 65.5 x H. 165 cm
- **Frame profile:** 25 x 25 mm square tube
- **Shelf spacing:** 68 mm (space between rails)
- **Load capacity:** 20 kg per single level
- **Movement:** 4 swivel wheels (2 equipped with brakes)
- **Protection:** Round bumpers on each wheel
- **Operating weight:** 23 kg

INFORMATION

- **Length in millimetres** 455.000000
- **Depth in millimetres** 655.000000
- **Height in millimetres** 1650.000000
- **size pans** GN 1/1 - 53 x 32,5 cm
- **capacity** 20 Trays
