

Tray trolley with 8 tiers h215_244

Professional stainless steel tray trolley (46x61x84.5 cm) for 8 GN 1/1 or GN 1/2 trays. Structure with worktop, anti-slip protection and Ø125 mm wheels. Supplied already assembled.

The **H215_244 professional tray trolley** is a high-profile technical solution designed to optimize workflows in restaurants, bakeries, and industrial kitchens. Made of **1.4031 stainless steel (Made in Germany)**, this model combines storage functionality with preparation thanks to the **integrated worktop**. The structure solves safety issues during handling thanks to the "U"-shaped support bracket with anti-slip system on both sides, which keeps **GN 1/1 and GN 1/2** containers perfectly stable. The ergonomic height of 84.5 cm makes it ideal as an under-counter mobile station or as an extension of existing work surfaces, ensuring hygiene and protection thanks to the integrated black splash guards.

Technical features

- **Material:** High-quality 1.4031 stainless steel (corrosion-resistant)
- **Load capacity:** 180 kg (reinforced structure for intensive use)
