

Tree grate with frame h744_47

Tree grate with 100x100 cm frame and internal hole Ø 50 cm. Complete with support frame.

The **H744_47 tree grate** is a functional and resistant solution for protecting the base of trees in urban contexts. Made with a **100x100 cm frame**, it includes a central opening with an internal diameter of **50 cm**, suitable for allowing tree trunk growth without compromising stability or development.

Ideal for installation on sidewalks, squares, parks, or other public spaces, this grate helps preserve the soil at the base of trees, protecting it from trampling and promoting water drainage. The **included structural frame** allows for stable fixing into the laying surface.

With a practical design and standard dimensions, the product is easily integrated into urban furniture and public green projects.

Enhance and protect urban green spaces. Request a quote for the **H744_47 tree grate** with frame included.
