

Triple indoor waste recycling container h719_14

Compact three-compartment container with colored self-closing flaps to identify the type of waste. Dimensions: 920 x 580 x 380 mm.

Waste recycling bin for indoor installation in areas such as sports complexes, educational facilities, universities, shopping centers, offices, and companies. Material: **powder-coated galvanized sheet steel**. High quality and durability. **Compact fireproof structure**, equipped with **3 self-closing flaps** in **anthracite grey RAL 7016**, **signal yellow RAL 1003**, **gentian blue RAL 5010** and **3 internal containers** with a **capacity of 3 x 30 liters**. The **front hinged door** with **square lock closure (key included)** allows for quick removal of the internal containers, which can be extracted via specific **handles on each container**. The entire structure rests on **two adjustable feet** located at the front, ensuring stable placement even on uneven surfaces. The perfect solution, combinable and adaptable for both spacious and confined areas.

Technical features:

- Material: powder-coated galvanized sheet steel
- Dimensions: h 920 x w 580 x d 380 mm
- No. of compartments: 3
- No. of internal containers: 3
- Capacity: 3 x 30 liters
