

Trolley for 2 oxygen cylinders h695_04

Painted steel hospital trolley for 2 oxygen cylinders 10/11L, with safety belts and 4 lockable galvanized wheels, suitable for transport in clinics and nursing homes.

The oxygen cylinder trolley is a specific aid for the safe and efficient transport of cylinders in healthcare environments. Designed for hospitals, clinics, and nursing homes, it allows for the rapid and controlled movement of two 10/11 liter cylinders each through corridors and limited spaces, reducing the manual load on staff and minimizing the risk of material damage.

Technical features

- Structure in **powder-coated steel** RAL 9016 finish (pure white)
- Capacity: **2 cylinders of 10/11 liters** each
- Maximum load: **2 × 25 kg** (50 kg total)
- **Safety belts** for securing the cylinders
- **4 wheels Ø 75 mm in galvanized steel** (2 lockable)
- **Electrically conductive** wheels
- Base dimensions: **600 × 505 mm**
- Height: **approx. 960 mm**
- Self-weight: **approx. 7 kg**
