

Trolley for electromedical equipment h964_05

Medical equipment trolley with 3 adjustable shelves, double-jointed extensible arm and cable supports. Dimensions: approx. W 51 x D 45 x H 90 cm.

The **trolley for electromedical equipment H964_05** is a versatile and functional solution designed for hospitals, clinics and medical offices. This trolley is ideal for organizing and transporting medical devices, instruments and accessories efficiently and safely, improving the workflow of healthcare personnel. The robust structure, combined with its advanced features, guarantees **reliability, practicality and resistance**, making it an indispensable tool in wards and operating rooms.

The trolley consists of **3 shelves**, made of white powder-coated steel with **raised edges** to prevent instruments from slipping during movement. The arrangement of the shelves is adjustable thanks to the **mounting channels on the external and internal sides of the structure**, allowing you to customize the space according to specific needs. This adjustment system is particularly useful in dynamic contexts, where it is necessary to quickly adapt the trolley to different types of medical equipment and instruments.

One of the strengths of the trolley is the **double-jointed extensible arm with head**, which offers flexible support for devices such as monitors or other medical equipment. The ability to adjust the orientation and extension of the arm allows for positioning equipment in the ideal position for optimal viewing or to facilitate access to tools. This feature is particularly useful in operating rooms and diagnostic departments, where precision and efficiency are fundamental.

The trolley is also equipped with **2 cable supports**, which help keep equipment cables tidy and organized, reducing the risk of tangles and tripping. This cable management is essential to ensure safety and operational efficiency, especially in contexts where multiple devices are used simultaneously. The **included instrument rail** provides additional support space for hanging extra tools or accessories, helping to keep the work area always organized and functional.

The structure of the trolley is made of **white powder-coated aluminum**, a lightweight but extremely resistant material that guarantees durability and ease of cleaning. The mounting channels are closed by a **flexible and removable gasket**, which prevents dirt accumulation and facilitates sanitization operations. This detail is essential for maintaining the high hygiene standards required in hospital and healthcare environments.

The **steel base with white ABS plastic** cover offers additional protection against impact and wear. The ABS cover is easy to clean and resistant to disinfectants, ensuring simple and fast maintenance. The trolley is equipped with **75 mm plastic wheels**, **two of which have safety brakes**, for easy and stable movement even in tight spaces. The brakes ensure that the trolley remains still during use, preventing accidental movements and ensuring the safety of staff and patients.

The **decorative elements in RAL 5012 blue** add a touch of color and contribute to creating a more pleasant work environment. It is also possible to customize the trolley by choosing the white elements in an optional **grey** finish, offering greater aesthetic versatility to suit different contexts and preferences.

Optimize your department with the **trolley for electromedical equipment H964_05**. Robust, versatile and easy to clean, it is the ideal solution for organizing instruments and devices efficiently. **Order now** and improve your daily operations!

Technical specifications:

- **Structure:** White powder-coated aluminum
- **Shelves:** 3 shelves
- **Upper shelf dimensions:** 45 x 32 cm
- **Extensible arm:** Double-jointed with head
- **Cable supports:** 2 supports for tidy management
- **Instrument rail:** Included for hanging accessories
- **Base:** Steel with white ABS plastic cover
- **Wheels:** 4 wheels of 75 mm (2 with brake)
- **Total dimensions:** W 51 x D 45 x H 90 cm
- **Useful shelf area:** 40 x 27 cm
- **Decorative colors:** Blue RAL 5012

User benefits:

- **Optimal organization:** of instruments and equipment.
- **Customized adjustment:** of shelves and accessories.
- **Ease of movement:** thanks to wheels with brakes.
- **Robust and durable structure:** in aluminum and steel.
- **Tidy cable management:** for greater safety.
- **Easy sanitization:** with removable gaskets.
- **Versatile design:** with color customization options.

FAQ:

1. **Are the shelves height-adjustable?**
Yes, the shelves can be adjusted in height thanks to the mounting channels on the sides of the structure.
2. **Can the trolley be moved easily?**
Yes, the trolley is equipped with 75 mm plastic wheels, two of which have brakes for greater stability.
3. **Is the trolley easy to clean?**
Yes, the powder-coated structure and removable gaskets facilitate cleaning and sanitization operations.
4. **What accessories are included with the trolley?**
The trolley includes a double-jointed extensible arm, 2 cable supports and an instrument rail.
5. **Can I customize the color of the trolley?**
Yes, it is possible to have the white elements in an optional grey finish.

Short buying guide:

When choosing a **trolley for electromedical equipment**, it is essential to consider a series of key factors to ensure that the product is suitable for the operational needs of a healthcare environment. The **H964_05 trolley** is a versatile and robust solution, designed to meet the needs of hospital wards, clinics and medical offices. Its ability to combine advanced functionality, high-quality materials and intelligent design makes it an essential tool for improving daily efficiency and organization.

One of the most important elements to evaluate is the **configurability** of the trolley. The H964_05 model is equipped with **3 adjustable shelves** with dimensions of **450 x 320 mm**, which can be positioned at the desired height thanks to the **mounting channels** present on the external and internal sides of the structure. This feature allows you to easily adapt the trolley to different operational needs, allowing for the transport of instruments and devices of various sizes. The **raised edges of the shelves** prevent objects from slipping during movement, ensuring greater safety.

Another fundamental aspect is the management of spaces and instruments. The H964_05 trolley is equipped with a **double-jointed extensible arm with an adjustable head**, ideal for supporting devices such as monitors, diagnostic equipment or medical instruments. The flexibility of this arm allows for optimal orientation and positioning of the equipment, improving visibility and accessibility during medical procedures. This function is particularly useful in intensive care units, operating rooms and diagnostic clinics, where precision and speed of intervention are essential.

For tidy and safe cable management, the trolley is equipped with **2 cable supports** that help prevent tangles and reduce the risk of tripping. This system is essential for keeping the work area clean and safe, especially in environments where electrical devices are used simultaneously. Furthermore, the included **instrument rail** provides additional organization options, allowing you to hang extra accessories or tools to have everything at hand.

The structure of the trolley is made of **white powder-coated aluminum**, a lightweight but resistant material, ideal for healthcare environments. Powder coating guarantees long-lasting protection against corrosion and facilitates cleaning and sanitization. Furthermore, the **mounting channels** are closed by a **flexible and removable gasket**, which prevents the accumulation of dirt and bacteria, ensuring a hygienic and easy-to-maintain environment.

Another significant advantage is represented by the **steel base with a white ABS plastic cover**. ABS plastic is known for its resistance to impacts and chemicals used for disinfection, ensuring long life and simple maintenance. The base is equipped with **75 mm plastic wheels, two of which have safety brakes**, which allow for easy movement of the trolley and locking it in

position when necessary. This is particularly useful for ensuring stability during use, preventing accidental movements. An aesthetic touch is given by the **powder-coated decorative elements in RAL 5012 blue**, which add a pleasant and modern look to the trolley.

In summary, the **H964_05 trolley** is a multifunctional solution that combines practicality, resistance and versatility. It is ideal for transporting electromedical equipment, diagnostic instruments and accessories in an organized and safe manner. Thanks to the adjustable shelves, extensible arm, cable supports and robust structure, this trolley meets the needs of healthcare professionals, facilitating their daily work and improving operational efficiency. If you are looking for a trolley that offers an excellent combination of **advanced functionality, ease of use and ergonomic design**, the H964_05 model is the perfect choice for your department.
