

Two-compartment recycling container h957_57

62-liter indoor recycling bin in AISI 430 stainless steel, with two removable internal containers and color-coded openings.

The **h957_57 recycling container** is a professional two-compartment system designed for waste management in **indoor environments** that require hygiene and durability. Made of **polished AISI 430 stainless steel** according to the UNE-EN 10088-3 standard, the product solves the problem of waste separation thanks to a **removable top lid** equipped with two color-coded openings. Operational practicality is guaranteed by **two removable internal containers** in galvanized sheet metal, which facilitate emptying and cleaning maneuvers. The design is completed by a black PVC bottom edge with a metal insert at the base, which protects the structure and support surfaces, making it ideal for hotels, offices, and hospitality contexts.

Technical features

- **Type:** two-compartment recycling bin
- **External material:** polished AISI 430 stainless steel (UNE-EN 10088-3 standard)
- **Internal container material:** cold-rolled galvanized sheet metal (DX51D, EN 10346 standard)
- **Base:** PVC bottom edge with metal insert
- **Total capacity:** 62 liters
- **Net weight:** 12.6 kg
- **Structure dimensions:** 44.5 x 22.5 x H 70 cm
- **Configuration:** 2 compartments with removable internal containers
- **Signage:** two color-coded openings on the lid
- **Stickers:** not included
- **Certifications:** tested for abrasion resistance, impact, and fire stability
