

## Two multi-colored folding tatami mats h999\_33

Set of two multi-colored folding tatami mats (200x150x2 cm) in 35 kg PE foam. Safe space-saving solution for psychomotricity and nurseries.

The set consisting of **two multi-colored folding tatami mats h999\_33** is the ideal protective surface for psychomotricity activities and children's gymnastics. Designed specifically for schools, nurseries, and sports centers, this support solves the problem of space management within small gyms or multi-purpose facilities, where different disciplines frequently alternate. The mats offer a safe and comfortable environment, allowing children to walk, jump, play, and develop their motor skills in total protection. Made of 35 Kg PE foam, they guarantee excellent shock absorption combined with remarkable lightness, ensuring maximum versatility of use and minimizing the logistical footprint once closed at the end of the activity.
