

Two-post advertising totem h738_209

Double-sided outdoor totem in aluminum and sheet metal with double silver post, height 1400 mm and circular base. Ideal for outdoor signage.

The **two-post advertising totem** is a double-sided display solution designed to ensure maximum visibility in outdoor contexts and transit areas. Thanks to the structure with **anodized aluminum double posts** and convex sheet metal surfaces, the product solves the problem of self-supporting visual communication, offering stability and resistance to atmospheric agents. It is the ideal support for companies, public entities, and commercial activities that require clear, elegant, and durable signage.
