

Two-seater convertible gas cylinder transport trolley h55_111

Two-seater steel cylinder holder for the safe transport of 40/50 liter gas cylinders. Solid wheels, safety chain, integrated toolbox, 200 kg load capacity.

The **two-seater cylinder holder** is a specialized solution for the safe and controlled transport of 40/50 liter compressed gas cylinders in industrial, technical, and professional contexts. Designed to prevent accidental falls and ensure stability during movement, the trolley combines structural strength with practical use, addressing the need to move pressurized containers with certainty in environments where safety control is critical.

The structure is made of **electrowelded steel with epoxy powder coating**, ensuring durability and corrosion resistance. The movement system features **2 solid rubber wheels Ø 300 mm** and **2 swivel solid rubber wheels on a joint Ø 125 mm**, with zinc-chromed and riveted pressed steel sheet hubs. The **cylinder holder plate is laser-cut (thickness 30/10)**, ensuring dimensional precision and structural reliability.

To increase safety and operational practicality, the trolley is equipped with a **containment system via a red-painted chain** (for high visibility) and an **ergonomic push handle** that facilitates movement operations. An **integrated toolbox** (475 x 155 x h. 170 mm) is included for managing small technical accessories.

Technical features

- Dimensions: W. 780 x D. 490 x h. 1335 mm
- Transformed dimensions: W. 780 x D. 1210 x h. 1000 mm
- Weight: approx. 25 kg
- Configuration: two-seater
- Compatibility: Ø 230 mm cylinders
- Capacity: 40/50 liters
- Maximum load capacity: 200 kg
- Material: electrowelded steel, epoxy powder coated
- Fixed wheels: 2 x solid rubber Ø 300 mm
- Swivel wheels: 2 x solid rubber on joint Ø 125 mm
- Wheel hubs: zinc-chromed and riveted pressed steel sheet
- Maximum operating speed: 4 km/h
- Cylinder ring height: 940 mm
- Cylinder ring circumference: 230 mm
- Loading plate: 580 x 200 mm
- Toolbox: 475 x 155 x h. 170 mm
- Containment system: red-painted chain
- Cylinder holder plate: laser-cut, thickness 30/10

- Handle: ergonomic push
- Certification: CE compliant
