

Two-seater gas cylinder trolley with pneumatic wheels h55_114

Steel double cylinder trolley for 40/50 lt compressed gases. Ø300 mm pneumatic wheels, toolbox, safety chain, CE compliant.

The two-seater cylinder trolley is a specialized transport equipment for compressed gas cylinders, suitable for both industrial and hospital contexts. Specifically designed for the safe and efficient handling of 40/50 liter cylinders with a diameter of 230 mm, it allows the simultaneous transport of two units, reducing handling times and optimizing logistical cycles.

The **welded steel structure with epoxy powder coating** ensures robustness and resistance to corrosion in diverse environments. The **2 Ø300 mm pneumatic wheels with roller bearing rotation** ensure maneuverability on multiple surfaces (asphalt, concrete, dirt road, grided flooring). The **cylinder holder plate, laser-cut with a thickness of 30/10 mm**, offers geometric precision and structural reliability. The trolley is equipped with an **integrated toolbox, ergonomic push handle and restraint system via red painted chain** for securing the cylinders.

Technical features

- **Dimensions:** W. 810 x D. 490 x H. 1335 mm
- **Weight:** approx. 20 kg
- **Configuration:** two-seater
- **Cylinder compatibility:** Ø230 mm, 40/50 liter capacity
- **Maximum load capacity:** 200 kg
- **Structure material:** electro-welded steel, epoxy powder coated
- **Wheels:** 2 pneumatic Ø300 mm with roller bearings
- **Maximum operating speed:** 4 km/h
- **Cylinder ring height:** 940 mm

- **Cylinder ring circumference:** 230 mm
- **Loading plate:** 580 x 200 mm
- **Toolbox:** 475 x 155 x H. 170 mm
- **Restraint system:** red painted chain
- **Push handle:** ergonomic
- **Regulatory compliance:** CE
