

Two-tone metal bench with backrest h14004

Two-tone metal bench with backrest suitable for public spaces and urban furniture. Made in Italy

Two-tone **metal bench** with backrest featuring an innovative and elegant design, ideal for furnishing and enhancing urban spaces.

This bench is a bench that stands out; its ambitious **mix of colors** capable of attracting attention and at the same time harmonizing the surrounding environment with customized colors, is capable of breaking the monotony of places with **bright** and unique colors or blending into modern and futuristic contexts. A new style that enhances the perceptual sensations of urban spaces; you sit down and the **naturalness of the ergonomic seat** provides **relax** and **comfort**, after all, it is exactly what is expected from an urban furniture bench.

Structure:

- n° 02 stylized supports consisting of a double profile in galvanized steel sheet thickness 60 / 10 with decorative engraving on the internal profile; each individual support is provided with plates, at the base, in galvanized sheet metal;
- seat frame made with n° 11 profiles in round galvanized steel tube of mm. ? 20 x 1.5 and n° 01 profile in round galvanized steel tube of mm. ? 40 x 1.5,
- backrest frame made with n° 14 profiles in round galvanized steel tube of mm. ? 20 x 1.5 and n° 01 profile in round galvanized steel tube of mm. ? 40 x 1.5; the profiles on the seat and backrest are welded onto specific galvanized steel shapes, which give it its anatomical shape.

Fixing:

- the supports are equipped with plates provided with holes for anchoring to the ground using anchor bolts and expansion plugs;
- the bench is supplied in an assembly kit, with stainless steel screws and assembly instructions.

Anti-corrosion treatments and finishing:

Pre-treatment

- before being painted, the product is pre-treated by spray washing with special degreasing liquids. After washing, the product to be painted is dried for 15 minutes in a drying oven

Anti-corrosion treatment:

- in order to provide suitable protection against atmospheric agents, the product is subjected to a first painting cycle using an anti-corrosion thermosetting powder primer based on epoxy resins with special pigments.

First baking (anti-corrosion):

- the product treated with the anti-corrosion primer is subjected to a first oven baking lasting 15 minutes at a temperature of 180°. In this phase the anti-corrosive polymerizes, forming a coating thickness of approximately 60 microns.

Painting:

- the product is subjected to a final painting cycle with thermosetting powder based on polyester resins in color “**ruby red**” **RAL 3003** (external shapes) and “**brilliant aluminum**” (internal shapes and frames). The painting is carried out with electrostatic spray equipment, which allows the powder to settle uniformly on the pieces, forming a minimum thickness of 60 microns.

Final baking:

- the painted product is subjected to a final oven baking lasting 20 minutes at a temperature of 160°.

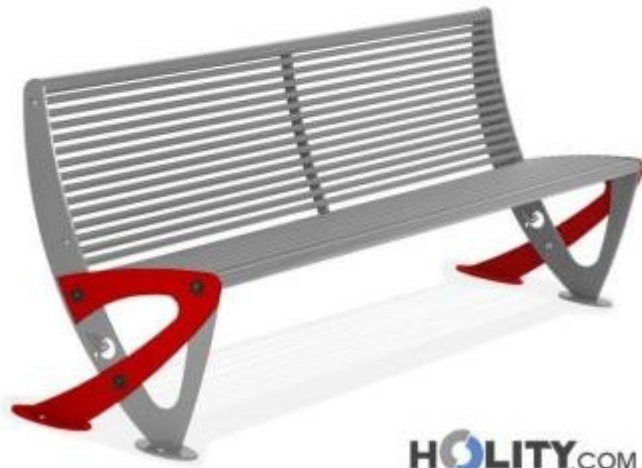

Dimensions:

- total height 80 cm
- length: 150 cm
- depth 60 cm
- seat height 45 cm
- Weight: 66 Kg
