

Ultra-fast conveyor toaster h23_57

Professional ultra-fast conveyor toaster ideal for fast food outlets, burger shops, and restaurants. Hourly production: +600 slices. Weight: 31 kg.

Professional toaster with a **heavy-duty metal structure** that is **cool on the outside**, designed for **daily and continuous 24/24 use** in environments with a high presence of fats, fumes, oils, and with ambient temperatures up to 35 °C. This model is perfect for use in **fast food outlets, restaurants, burger shops, and entertainment parks**. **Conveyor type** with **quartz heating elements** and **separate power controls** (top and bottom), which allow for precise regulation of the bread toasting degree. The **conveyor speed**, made of stainless steel, is **adjustable** with different speeds, allowing it to keep up with activities of varying output. Thanks to the **wide front opening**, the toaster **allows heating and toasting different types of bread**, including bread slices up to 6 cm thick; slices of different thicknesses simultaneously; industrial frozen and pre-cut bread slices; irregular bread slices; and bread slices seasoned with butter and oil. **Super heavy-duty, flexible, and top-quality structure**, equipped with a **stainless steel crumb tray**. **Entirely designed and manufactured in Italy, compliant with CE regulations.**

Technical features:

- Heavy-duty metal structure
- Production/hour: +600 slices
- External dimensions: L. 35 x D. 31 x h. 47 cm
- Toasting chamber dimensions: 25 x 6 cm
- Power: 2.30 Kw
- Weight: 31 kg
- Power supply voltage: 230 V 50-60 Hz
- Cable length: 1.5 m Schuko
- Quartz heating elements
- Separate power controls (top and bottom)
- Stainless steel conveyor belt with adjustable speed
- Increased chamber dimensions for toasting bread slices up to L. 14 x 14 x h. 6 cm
- Quick-release panel fastening system for immediate access to the internal parts of the machine
- Enhanced belt drive system with anti-slip technology in the presence of oil
- Removable and replaceable filter for protecting internal components
- Resettable safety thermostat that triggers before components and the circuit board can break
- Resettable safety thermostat on the panel
- Quick replacement system for heating elements
- Quick removal of the rear chute
- Crumb tray included as standard

- Can be used with bread of different consistencies
