

## Umbrella bag holder h957\_25

Metal support for umbrella bags. Dimensions: Ø 33 x H 99 cm. Weight: 5.8 kg.

The **umbrella bag holder h957\_25** is a professional metal support designed for managing wet umbrellas in high-traffic environments. The structure consists of a **cold-rolled white sheet metal** base and an iron supporting tube with reinforced support bars, ensuring maximum stability and mechanical resistance. Thanks to the electrostatic painting with **polyester resin polymerized at 200°C**, the product offers superior protection against scratches, impacts, and corrosion. This display solves the operational problem of rainwater dispersion at entrances, preventing stains and dangerous slips on smooth floors in offices, hotels, and commercial spaces.

## Technical features

- **Base material:** cold-rolled white sheet metal.
- **Supporting tube:** iron, diameter Ø 40 mm (thickness 1.5 mm).
- **Support bars:** calibrated round Ø 10 mm.
- **Finishes:** impact-resistant polyethylene.
- **Dimensions:** Ø 33 x H 99 cm.
- **Weight:** 5.8 kg.
- **Color:** Grey RAL 9006.
- **Painting:** polyester powder (thickness 60 microns).
- **Compliance:** resistant to abrasion, impact, and fire stability.

## Optional

- Pack of 500 bags for long umbrellas.
