

Umbrella stand design h9633

Umbrella stand design made of plexiglass. Design and production made in Italy. Available in more colors.

A simple and elegant umbrella stand that combines beauty and functionality thanks to its sleek design and elegant at the same time. Seemingly fragile is instead very robust thanks to the material of which it is composed, **plexiglass**, in fact.

Plexiglas is a material aesthetically very similar to glass which provides excellent transparency and excellent mechanical skills and ensuring a high degree of impact resistance: in its transparency can replace the plexiglass so egregious glass possessing mechanical characteristics of behavior similar to the fiber optics and with the property of having a breaking point higher than the glass itself ensuring excellent UV resistance, excellent thermal stability and a low water absorption.

This umbrella is available in the variants:

- white
- transparent
- white-dove

Technical features:

- Italian product
- Design STG Vesta
- 28x16.5x60 cm dimensions (WxDxH)
