

Umbrella stand for common areas h957_26

Perforated sheet metal umbrella stand with water collection tray. DC01 steel, Ø 21.5 x H 51 cm. Fireproof and ventilated design for public spaces and offices.

The **H957_26 perforated umbrella stand** is a technical solution designed for the professional management of entrances in high-traffic contexts such as offices, accommodation facilities, and public premises. The **perforated sheet metal** body resolves the problem of moisture stagnation, ensuring constant ventilation that accelerates the drying of umbrellas and prevents the formation of unpleasant odors. The structure integrates a **water collection tray** in shockproof polystyrene, essential for maintaining floor hygiene and preventing slipping risks.

Technical features

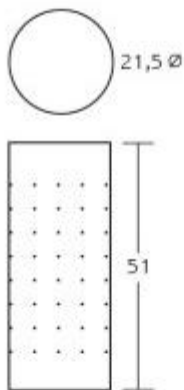

- **Material:** Cold-rolled white sheet steel of DC01 quality (EN10130 standard).
- **Surface protection:** High-resistance polyethylene finishes.
- **Collection system:** Internal shockproof polystyrene tray, removable for maintenance.
- **Fireproof treatment:** Polyester resin painting compliant with classes A2-s1, d0 (UNE EN 13501) and M1 (UNE 23727).
- **Finishing process:** Polymerization at 200°C for 20 minutes with a thickness of 60 microns.
- **Dimensions:** Ø 21.5 x H 51 cm.
- **Operating weight:** 1.6 kg.
- **Certifications:** Tested for fire stability and mechanical resistance to abrasions and impacts.

The product is available in various color variants for coherent integration into any interior design project.
