

Umbrella wrapping machine h13906

Manual wrapping machine for small umbrellas in AISI 430 stainless steel, light and compact. Dimensions: W 33.2 x D 33.8 x H 84 cm.

The **umbrella wrapping machine h13906** is a specialized technical solution for managing folding umbrellas in professional and public contexts. Made of **painted AISI 430 stainless steel** in metallic silver with an ABS resin lid, this unit combines lightness and mechanical resistance. The system solves the operational problem of wet and slippery floors, preventing the risk of accidents and ensuring the hygiene of indoor environments. Operation is **completely manual**, eliminating the need for batteries or electrical connections. Thanks to its **patented model** and compact design, it integrates perfectly into the entrances of offices, shops, and healthcare facilities, ensuring compliance with European Directive 89/654/ECC on workplace safety.
