

Unbreakable transparent catering tray GN 1/1 h34228

Unbreakable tray ideal to meet the needs of the catering sector. 100% Italian. Made of polycarbonate. Stackable and resistant

Unbreakable tray designed to meet the needs of the catering sector and usable in multiple contexts from banqueting to buffets, from corporate meetings to receptions, up to bars for happy hour, etc.

It's made of **transparent technopolymer** with injection molding, a guarantee of brilliance that thus enhances the beauty and color of the food and of resistance. The technopolymer indeed ensures resistance to impacts and falls.

It's produced entirely in Italy, a guarantee of style, design, and ergonomics.

The serving surface is placed, in relation to the side surfaces, so that, with a simple flip, it is possible to change the depth of the tray. With this arrangement, it is possible to vary the internal height even when multiple trays are stacked.

The male/female guides placed on the handles with a diamond-effect embossed texture allow for multiple stacking and display combinations

The side wings allow storage in specific trolleys and tray cabinets, as well as transport inside thermal containers

The h34228 tray complies with GN 1/1 gastronorm measurements and can be washed in the dishwasher

Features
