

Underground horizontal cylindrical water tank h668_17

Horizontal water tank designed for underground installation. Capacity: 500 lt. Dimensions: W. 1150 x D. 750 x h. 840 mm. Color: black.

The **underground tank** for the collection of drinking and rainwater, made of **100% recyclable LLDPE**, represents the innovative and sustainable choice for water management, combining **efficiency, resistance and sustainability**. **Horizontal** model, designed for underground installation, optimizing available space and integrating harmoniously into the environmental context. Its **monobloc structure**, in **black color**, is characterized by particular **thermal and mechanical resistance**. Equipped with a **male threaded closing cap**, provided with **vents**. The tank has a **capacity of 500 lt.**

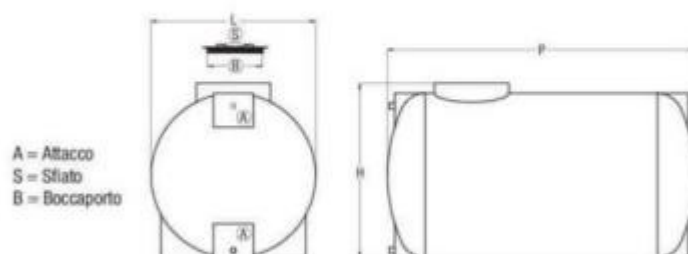

Technical features:

- Shape: cylindrical
- Type: horizontal
- For drinking and rainwater
- Made of 100% recyclable LLDPE, with additives to resist UV rays
- Color: black
- Dimensions: W. 1150 x D. 750 x h. 840 mm
- Capacity: 500 lt
- Closing cap 225 mm, male threaded, equipped with vents
- Inlet connections: 1/2"
- Outlet connections: 1"
- For underground installation

INFORMATION

- **Material** polietilene
- **Typology** horizontal
