Universal AED cabinet h454_10

Green steel cabinet for defibrillator with 100 dB magnetic alarm and wall mounting. Indoor use.

The AED cabinet is a case made of **official green steel**, designed to house and protect defibrillators in indoor environments. It represents a practical and regulated solution to make the emergency device quickly accessible and visible, preserving its integrity and ensuring readiness for intervention in case of need.

The case is equipped with a **100 dB magnetic alarm** that warns of unauthorized opening, a crucial element for sensitive contexts such as hospitals, public offices, and facilities where access control is relevant. The alarm can be **activated and deactivated via an internal switch**, allowing flexible management according to the facility's operational procedures.

Technical features

- **Material:** steel
- **Color:** green (international AED logo)
- **Overall dimensions:** W. 36 × D. 20 × H. 36 cm
- **Door dimensions:** 27 × 32 cm
