

Universal liquid emergency response kit h104317

Emergency spill response kit h104317 for universal liquid absorption. Supplied in a nylon bag with a shoulder strap and transparent PVC window. Minimum absorption capacity 38 liters.

The **universal liquid emergency response kit h104317** is a professional emergency system, specifically designed for the rapid and general absorption of a wide range of industrial liquids. The kit is entirely contained within a robust and flexible nylon bag, equipped with a shoulder strap for immediate transport and a transparent PVC window that allows checking the contents at a glance. Thanks to its compact format, this emergency kit easily fits into transport vehicle cabins, making it ideal for meeting current regulations regarding safety in the transport of dangerous materials. With a total weight of approximately 5 kg, it ensures a minimum absorption capacity of 38 liters and includes a supply of pads, absorbent socks, and personal protective equipment.
