

## Universal liquid spill kit 175 L absorbency h1043\_23

175 L universal spill kit in mobile metal cabinet. Dimensions: 580x460x1000 mm. Steel sheet with wheels and safety lock.

The **universal liquid spill kit** (model h1043\_23) is a high-capacity emergency response system, housed inside a mobile metal cabinet with a handle for easy positioning. Designed specifically for workshops, industries, logistics depots, and maintenance departments, this equipment is aimed at company safety managers who need a centralized and protected mobile decontamination station. The system solves the operational problem of the **secure storage of absorbent materials and the timeliness of intervention** in the event of major spills of general fluids or hazardous substances on industrial floors. The cabinet is made of P02 carbon steel sheet, subjected to a phospho-degreasing treatment in high-temperature tunnels and finished with RAL1021 YELLOW epoxy-polyester painting with curing in a thermal tunnel at 180°, ensuring maximum structural strength and immediate visibility in case of an environmental emergency.

## Technical features

- **Minimum absorbent capacity:** 175 liters
- **Cabinet dimensions (WxDxH):** mm 580x460x1000
- **Structure material:** P02 carbon steel sheet
- **Surface treatment:** phospho-degreasing in high-temperature tunnels
- **Painting:** epoxy-polyester RAL1021 YELLOW with 180° thermal tunnel curing
- **Logistics configuration:** mobile cabinet equipped with positioning handle, 2 rear rubber wheels, and front adjustable feet
- **Internal organization:** height-adjustable storage shelves
- **Locking system:** ergonomic plastic and aluminum lock with double key, complete with rod closure and anti-tamper rod covers
- **Absorbent rolls included:** 1 absorbent roll measuring 41 cm x 46 m
- **Absorbent socks included:** 7 absorbent socks measuring 7.6x120 cm
- **Absorbent pillows included:** 2 absorbent pillows measuring 25x25 cm
- **Bulk absorbents included:** 1 bag of 10 kg granulated absorbent powder
- **Cleaning accessories:** 1 dustpan and brush kit
- **Eye protection devices:** 1 pair of protective goggles
- **Hand protection devices:** 1 pair of neoprene gloves
- **Waste disposal systems:** 5 waste collection bags
- **Specific intended use:** absorption and containment of universal liquids, water, oils, and industrial fluids
