

Universal wall-mounted fire extinguisher holder h495_03

Universal metal fire extinguisher support (Ø 100-200 mm), with panic release system and control seal, ideal for heavy vehicles and buses.

The **wall-mounted fire extinguisher holder** is a mechanical device designed to ensure secure fastening and rapid deployment of fire-fighting equipment on board transport vehicles and in industrial contexts. The **high-resistance metal** structure is designed to withstand mechanical stress and vibrations typical of moving vehicles, ensuring that the fire extinguisher remains in position until the moment of actual use.

The system is equipped with an intuitive **panic release** and a **control seal** that allows for immediate verification of the station's integrity. Versatility is guaranteed by adjustable fastening straps, making the support compatible with various cylinder diameters.

Technical features

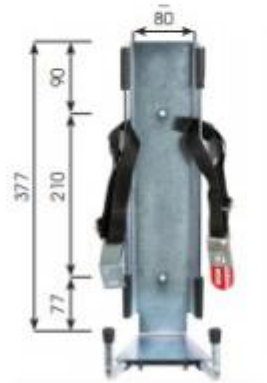

- **Material:** high-resistance metal
- **Fixing:** n°2 holes 7 mm diameter for wall anchoring
- **Compatibility:** adjustable for cylinders with diameter from 100 to 200 mm
- **Safety:** quick panic release system and control seal
- **Locking system:** n°2 sliding vertical straps with metal buckles and locking clips
- **Protection:** n°4 support bumpers and n°2 protection caps for the cylinder
- **Stability:** n°4 set screws for the adjustment slides
- **Total height:** 377 mm
