

Urban bollard h1003_23

Cylindrical galvanized steel bollard with ornamental sphere, Ø 7.6 cm and height 110 cm. Ideal for the decor and safety of historic centers.

The **H1003_23 bollard** is an urban furniture element designed to combine space protection and architectural decor. Featuring a linear cylindrical structure topped by an **ornamental sphere**, it fits harmoniously into prestigious contexts, limited traffic zones and pedestrian paths. Made of **galvanized steel** and finished with thermosetting polyester powder coating, the device guarantees high resistance to corrosion and atmospheric agents, minimizing maintenance interventions.

Technical features

- **Frame material:** galvanized steel with thermosetting polyester powder finish.
- **Dimensions:** Ø 7.6 cm x height 110 cm above ground.
- **Weight:** 8 kg.
- **Decorative element:** ornamental sphere placed at the top.
- **Anchoring system:** setup for flange with holes for bolts (not provided) or version with extensions for embedding in concrete.
- **Finishes:** available colors according to the RAL color chart.
- **Intended use:** outdoor environments, pedestrian areas and public spaces.
