

Urban furniture barrier with wide base h140_558

Urban furniture barrier in steel and Nordic pine 100x100cm. Trapezoidal design with integrated bicycle parking function on both sides.

The **H140_558 urban furniture barrier** represents an advanced solution for the delimitation of public spaces, combining the function of perimeter protection with a contemporary design. The structure is distinguished by its trapezoidal frame made of **6 mm "T"-section steel profiles**, arranged in an alternating orientation to create a dynamic visual rhythm. The integration of **Nordic pine wood slats** not only softens the aesthetics of the product, but enables the use of the barrier as a bidirectional rack, optimizing the use of urban space.

Resistance to atmospheric agents is guaranteed by a rigorous **anticorrosive cycle** that includes sandblasting, epoxy primer and thermosetting powder coating in **RAL 9010 (pure white)**, with baking at 180°C for a smooth surface finish that remains unalterable over time.

Technical features

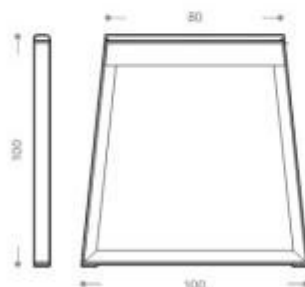

- **Dimensions:** 100.0 cm (height) x 100.0 cm (width) x 7.0 cm (depth)
- **Operating weight:** 22.0 kg
- **Metallic structure:** Steel with 6 mm thick "T" section
- **Inserts:** Natural Nordic pine wood
- **Finish:** Anticorrosive treatment and RAL 9010 powder coating
- **Configuration:** Wide base for greater structural stability
- **Installation:** Prepared for ground cementing
- **Supply:** Fully assembled product with steel screws included
