

Urban furniture bench in galvanized steel h287_113

Urban furniture bench in galvanized and painted steel, length 200 cm with oval tubular slats and certified UNI 11306:2009 compliance.

This **bench for public spaces** is designed to offer an ergonomic seat and high structural resistance in high-traffic outdoor contexts. The load-bearing structure stands out for its 200 cm seat and backrest composed of **oval steel tubular slats** (section 40 x 20 mm), finished at the ends with black polyethylene finned head covers to ensure maximum user safety.

Stability is ensured by two lateral supports in **galvanized steel** round tube with a diameter of 60 mm, shaped like an inverted "U" for solid anchoring to the ground. The finishing process involves a rigorous industrial cycle: vapor degreasing, electrostatic powder coating with non-toxic powders, and oven curing at 180/200° C. This treatment gives the product superior protection against atmospheric agents and corrosion.

Technical specifications

- **Material:** High-resistance galvanized steel
- **Overall dimensions:** 212 x 56 x 76 cm
- **Seat/backrest length:** 200 cm
- **Seat height:** 45 cm
- **Slats:** Oval tubular section 40 x 20 mm
- **Supports:** Round tube Ø 60 mm in galvanized steel
- **Anchoring:** Ground fixing via plates at the base of the supports
- **Painting:** UV-resistant non-toxic thermosetting powders
- **Hardware:** Galvanized steel according to UNI 3740
- **Weight:** approx. 50 kg
- **Compliance:** Built according to UNI 11306:2009 safety requirements and test methods
