

Urban furniture bench with backrest h109_360

Robust bench in steel and pine wood, pressure-treated. Dimensions: W 200 x D 37 x H 87.3 cm.

The **urban furniture bench with backrest h109_360** is designed to combine aesthetics, functionality, and durability, making it perfect for use in public spaces such as parks, pedestrian areas, squares, and gardens. Made with high-quality materials, this bench offers a robust structure and a comfortable seat for users.

The structure is built in **galvanized steel** and finished with a **thermosetting polyester powder coating** in an anthracite gray shade, which guarantees protection against atmospheric agents and corrosion. The seat consists of **6 pine wood slats** sectioned at 45x140 mm, treated with a **pressure-treatment process**, which protects the wood from moisture, insects, and mold, extending its lifespan over time.

The ergonomic design ensures optimal comfort: the backrest is fixed directly to the seat using steel supports cut with **laser technology**, with shaped slats to ensure natural back support. The sheet metal supports at the base, equipped with openable caps, allow for **stable anchoring to the ground** using bolts, ensuring maximum safety and stability.

Suitable for **outdoor environments**, this bench is designed to last over time, keeping its modern aesthetic and comfort intact. The **stainless steel** hardware is a further detail that ensures resistance to corrosion, even in difficult climatic conditions.

Choose the **urban furniture bench h109_360** for your public space: a mix of contemporary design and maximum robustness. Perfect for creating welcoming and functional environments. Technical features:

- **Structure material:** Galvanized steel and thermosetting polyester powder coated
- **Slats material:** Pressure-treated pine wood
- **Total dimensions:** W 200 x D 37 x H 87.3 cm
- **Seat height:** 45 cm
- **Seat slats:** Section 45 x 140 mm
- **Ground anchoring:** Prepared for bolting
- **Structure finish:** Anthracite gray
- **Hardware:** Corrosion-resistant stainless steel

User benefits:

- **Designed:** to resist atmospheric agents, ideal for outdoor environments.
- **Guaranteed comfort:** thanks to the ergonomic seat and backrest.
- **Materials:** high quality for intensive use and a long lifespan.
- **Installation:** secure with pre-drilling for anchoring.
- **Modern design:** and linear, adapting to any urban context.

FAQ:

1. **How is it fixed to the ground?**
The base of the bench is prepared for ground anchoring with specific holes.
2. **What material are the slats made of?**
The slats are made of pine wood.
3. **What is the seat height?**
The seat has a height of 45 cm.

Mini buying guide:

Choosing a bench for urban furniture requires attention to several aspects to ensure a long-lasting and functional investment. First of all, it is essential to evaluate the **materials**: a galvanized steel structure and treated wood slats, such as those that are pressure-treated, ensure resistance to atmospheric agents and longevity.

The **dimensions** are another important element: check that the bench integrates harmoniously into the intended space, considering not only the length but also the seat height for user comfort. In the case of public spaces, it is essential that the bench is equipped with a provision for **ground anchoring**, ensuring stability and safety.

Design also plays a crucial role. A bench with a **linear and modern profile**, like this one, easily adapts to contemporary or more traditional urban contexts, helping to enhance the surrounding environment. Finally, if you have special needs, check the possibility of customization for color and finishes, so as to satisfy specific aesthetic or project requirements.

This bench, with its mix of **quality, robustness, and comfort**, is an ideal choice for those looking for a practical and durable product.
