

Urban furniture bench with wooden planks h575_161

Robust bench with galvanized steel structure and Nordic pine planks. Dimensions: L 190 x D 51.2 x H 81.1 cm.

The **urban furniture bench H575_161** is an ideal solution for those looking for resistance, design and durability for outdoor public spaces such as parks, gardens, pedestrian areas and rest zones. The structure is made with a **galvanized steel C-profile** of 50 x 25 x 2 mm, ensuring high strength and resistance to corrosion over time. The seat and backrest are composed of **autoclave pressure-treated Nordic pine planks** with a section of 115 x 35 mm and rounded corners to offer greater safety to users.

The autoclave impregnation process gives the wood long-lasting protection against moisture, fungi and insects, making this bench ideal for continuous outdoor use with **low maintenance**. The fixing elements, such as screws, nuts and washers, are all made of **stainless steel**, ensuring further resistance to atmospheric agents.

Thanks to its length of **190 cm**, this bench offers ample space for several people at the same time. The seat height of **45 cm** and the ergonomic inclination of the backrest guarantee optimal comfort even for long periods of rest.

The combination of high-quality materials and a solid structure makes this bench a perfect choice for **durable and safe urban furniture** projects.

Don't miss the opportunity to make your public spaces more welcoming and functional with the **urban furniture bench H575_161**! Designed to last over time and guarantee safety and comfort, it is the perfect choice for parks, gardens and urban areas. Contact us today for a personalized quote on large quantities and discover how we can meet your urban furniture needs!

Technical specifications:

- **Structure:** Galvanized steel C-profile 50 x 25 x 2 mm
- **Seat and backrest:** Autoclave pressure-treated Nordic pine planks, section 115 x 35 mm
- **Total length:** 190 cm
- **Overall height:** 81.1 cm
- **Total depth:** 51.2 cm
- **Seat height:** 450 cm
- **Fixing elements:** Stainless steel screws, nuts and washers

User benefits:

- **High durability:** Galvanized structure and treated wood to resist atmospheric agents.
- **Guaranteed safety:** Rounded corners to prevent injuries.
- **Low maintenance:** Resistant materials that require little care over time.
- **Ergonomic comfort:** Seat height and inclination designed for comfortable sitting.
- **Versatility of use:** Suitable for parks, gardens, urban and pedestrian areas.

FAQ:

1. **Does this bench resist rain and sun?**
Yes, thanks to galvanized steel and pressure-treated wood, it is designed to resist atmospheric agents.
2. **Is it supplied with an assembly kit?**
Yes, a package with stainless steel screws, nuts and washers and instructions for quick and easy assembly is included.

3. Is it possible to have custom sizes or colors?

Yes, on request we can produce benches with customized sizes or finishes.

4. How is this bench installed?

It is designed to be fixed to the ground with included anchoring systems.

Short buying guide:

Choosing an urban furniture bench requires careful consideration of various factors to ensure that the investment is durable, functional and aesthetically pleasing. First of all, it is essential to evaluate the **materials** it is made of. Galvanized steel is an excellent choice for the structure, because it offers superior resistance to corrosion and atmospheric agents, while autoclave pressure-treated Nordic pine wood guarantees durability over time, protecting the bench from moisture, fungi and insects.

The **safety** is another element not to be underestimated. Benches with rounded corners, such as the H575_161 model, offer additional protection, especially in environments frequented by children and the elderly. Ergonomic design is also crucial: a comfortable seat and a well-angled backrest guarantee relaxation and comfort during rest.

It is also important to consider the **dimensions** of the bench. A model 1900 mm long, like this bench, offers enough space to accommodate several people at the same time, making it perfect for high-traffic areas such as public parks, gardens, sidewalks and squares. The seat height of 450 mm ensures easy access for users of all ages.

Think also about the **ease of assembly and installation**. The H575_161 bench is supplied with a stainless steel fixing kit and clear instructions, making installation quick and easy. Anchoring to the ground is essential to ensure stability and safety, especially in areas exposed to wind or with frequent use.

Another aspect to consider is **maintenance**. For public spaces, it is important to opt for low-maintenance solutions. Materials such as galvanized steel and treated wood require very little care over time, thus reducing costs and periodic maintenance effort.

Finally, evaluate how the bench **integrates aesthetically** with the surrounding environment. A steel structure with natural wood finishes blends well with both modern urban spaces and traditional green areas, helping to create a welcoming and functional environment for citizens.

With these considerations, you will be able to choose a bench that combines **resistance, design and comfort**, improving the quality of public spaces and ensuring a durable solution over time.
