

## Urban furniture bollard h350\_97

Cylindrical cast iron bollard for urban furniture, diameter 14 cm, height above ground 64.6 cm. In-ground fixing for pedestrian areas and ZTL zones.

The **urban furniture bollard** is designed for managing vehicle flow and protecting pedestrian zones in public and private contexts. Featuring a **cylindrical structure with rounded edges**, this element combines the need for urban safety with a sober and functional design, suitable for historical centers and residential areas. The construction in **cast iron**, pre-treated with primer and subsequently oven-painted, ensures high protection against atmospheric agents and corrosive processes typical of outdoor environments.

## Technical features

- **Diameter:** 14 cm
- **Height above ground:** 64.6 cm
- **Total height:** 84.6 cm
- **Embedding depth:** 20 cm
- **Material:** High-quality cast iron
- **Treatment:** Anti-corrosive primer and oven-painting
- **Fixing type:** To be embedded directly into the ground
