

Urban furniture bollard h793_09

Urban street furniture bollard in painted steel, 10x5x100 cm. Design with triangular patterns, ideal for space delimitation and management.

The **urban street furniture bollard** is a technical solution designed for the intelligent management of flows and the physical delimitation of protected areas in public, corporate, or residential contexts. Made entirely of **painted steel**, this element combines high structural resistance with a modern and refined aesthetic, characterized by geometric triangular patterns that lighten its visual profile without compromising its solidity.

The slim design and the vertical development of 100 cm ensure optimal visual signaling, making it an effective tool for preventing unauthorized vehicle access and for precisely defining pedestrian paths. Thanks to the steel structure, the product ensures a long operating life even under intensive use conditions and constant exposure to atmospheric agents.

Technical characteristics

- **Material:** High-quality steel with a painted finish
- **Design:** Paneling with integrated triangular patterns
- **Dimensions:** W. 10 x D. 5 x H. 100 cm
- **Customization:** Available in various colors for architectural integration
