

Urban furniture bollard with reflective bands h1047_08

Removable urban furniture bollard h1047_08 in black painted galvanized steel with two 20 cm white reflective bands. Height: 100 cm above ground.

The **urban furniture bollard with reflective bands h1047_08** is a professional road delimitation and protection device with high visibility and structural resistance, developed specifically for **municipalities, public technical offices, employers, urban interior and exterior designers, traffic managers, and company safety officers**. This accessory responds to the organizational need to regulate traffic flows and safeguard public safety, solving the operational problem of **securing access to pedestrian areas, restricted traffic zones (ZTL), and company or public parking lots, while allowing emergency or service vehicles to pass in case of emergency or necessity thanks to a system of quick opening and disassembly of the passage**. Regarding materials, the unit is entirely made of robust galvanized steel with a black painted finish, enriched by two white reflective bands of 20 cm each, a structural treatment that guarantees excellent protection against rust and atmospheric corrosion while ensuring maximum reflectance and visibility at night or in low light conditions. The architecture of the post provides for an increased external diameter of 76 mm, offering superior visual presence and robustness, and develops a useful height of 100 cm above ground. Operation is based on an integrated mechanism with automatic closure of the position, while removal and unlocking operations take place through the use of a specific triangular key. The stability of the module on the ground is guaranteed by the positioning of a 35 cm deep lower ground socket, included in the supply of the post.

Technical features

- **Product type:** removable traffic bollard with high visibility reflective bands
- **Code reference:** h1047_08
- **Construction material:** galvanized steel
- **Surface and aesthetic protective finish:** painted in black
- **Integrated visual signaling devices:** two white reflective bands with a structural height of 20 cm each
- **External diameter of the post (D):** 76 mm (D76mm)
- **Useful height of the structure:** 100 cm above ground
- **Fixing base specifications (Anchoring):** 35 cm deep lower ground socket
- **Integrated locking mechanism:** post with automatic closure system
- **Unlocking and removal mechanics:** rapid removal of the metal post performed via triangular key (key not included, available as an optional accessory)
- **Main operational functionality:** allows for the quick opening and disassembly of a passage in case of emergency or logistical needs
- **Installation suitability:** outdoor areas, pedestrian access, road delimitations, and company or public parking areas

Optional:

- Triangular key
