

Urban furniture concrete bollard h450_42

Cylindrical sandblasted concrete bollard Ø 200x400 mm, weight 32 kg. Ideal for urban delimitation with anchoring via M/14 bush.

The **delimitation bollard** is an urban furniture element designed for the definition of traffic flows and the protection of pedestrian areas in public and private contexts. Made of **sandblasted concrete**, the product combines high mechanical resistance with a refined aesthetic, suitable for integration into historical centers and modern zones. The structure includes an integrated **M/14 bush** for stable and long-lasting anchoring to the installation surface.

Technical features

- **Diameter:** 200 mm
- **Height:** 400 mm
- **Weight:** 32 kg
- **Material:** high-resistance sandblasted concrete
- **Available finishes:** grey, white, lava stone type
- **Fixing system:** internal M/14 bush for ground anchoring
- **Installation:** fixing via threaded bar (not included) to be grouted into the ground

Installation notes: For correct anchoring, it is necessary to use a threaded bar to be inserted into the ground via chemical or mechanical grouting, onto which the bollard will be screwed. The bar is not included in the standard supply and is available on request.
