

Urban furniture concrete fountain with double basin h319_58

Concrete fountain for public spaces. With double basin. Dimensions: W.700 x D.450 x h.1210 mm. Taps not included.

The artistic **concrete fountain** made of worked and treated concrete represents an excellent choice **for embellishing any outdoor space**, giving a touch of **elegance and refinement** to urban and residential environments. Crafted with attention to detail and careful processing, this fountain stands out for its **robustness and durability over time**. Equipped with a **double ground-level basin**. The versatility of this fountain is reflected in its **various available finishes**, allowing it to integrate perfectly with any architectural and landscape style. Whether it is an elegant and formal environment or a more informal and contemporary space, the fountain adapts and enriches the surrounding area. The fountain **can be positioned directly on the floor**, thanks to its solid base, **or fixed more securely** with a specific adhesive, depending on needs and preferences. The **edges** of the fountain are finely **sanded and rounded**, not only for aesthetic reasons, but also to ensure safety and a touch of refinement to the design. It is important to note that **taps are not included** in the fountain supply, offering the flexibility to choose an element that best suits one's taste and the specific needs of the project. With its combination of **functionality, aesthetics, and customization**, this artistic fountain is a distinctive urban furniture element with a great visual impact.
