

Urban furniture fountain h287_165

Outdoor fountain in reinforced-vibrated concrete (45x42x101 cm). Polished travertine effect finish with protective water-repellent treatment.

This refined **outdoor fountain** is designed to combine monumental aesthetics with maximum structural resistance. Made of **reinforced-vibrated concrete** through continuous molding, the structure benefits from a high-frequency vibration process that ensures optimal compaction of the mix, eliminating porosity and increasing durability. The main body consists of a **monoblock** that integrates the lower base, column, and support base for the water collector.

The external surfaces feature an elegant **travertine marble effect**, polished for a prestigious tactile touch. Protection is provided by a specific **anti-degradation water-repellent paint**, designed to preserve the natural tone of the material and counteract the erosive action of atmospheric agents and UV rays.

Technical characteristics

- **Total dimensions:** L. 45 x D. 42 x H. 101 cm
- **Weight:** 130 Kg
- **Material:** Continuous molded reinforced-vibrated concrete
- **Finish:** Polished travertine marble effect
- **Treatment:** Anti-degradation water-repellent paint for outdoors
- **Monoblock structure (base/column/support):** 46 x 42 x 97h cm
- **Upper base tooth detail:** 35 x 31 cm
- **Column dimensions:** 20 x 22.5 cm
- **Upper base dimensions:** 28 x 25 cm
- **Integrated water collector:** Width 23 cm (inf.) - 30 cm (sup.) x Depth 22 cm x Height 22 cm
- **Collector support dimensions:** From 11x14 cm (inf.) to 16.5x10 cm (sup.)
- **Configuration:** Available in various finishes; taps excluded

INFORMATION

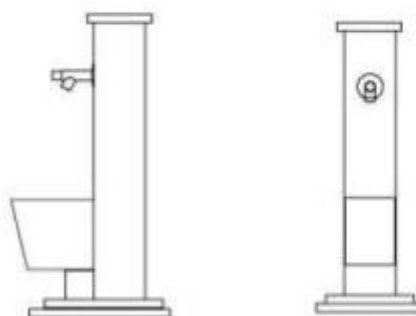

- **Material** cemento
- **Length in millimetres** 450.000000
- **Depth in millimetres** 420.000000
- **Height in millimetres** 1010.000000
- **Type** in column
